

SUCCESS Majlis™

The region's **honest** conversation about AI,
agents, and the future of work.

A studio conversation series recorded in Dubai, bringing together the leaders deploying artificial intelligence and the next generation entering a workforce being redrawn beneath their feet. No hype. No fear. Just what is actually working.

IN-STUDIO DUBAI EXPO CITY

30-45 MINUTES

ARABIC · ENGLISH

A MAJLIS FOR A NEW ERA

A **majlis** has always been where a community gathers to make sense of what matters. Success Majlis revives that idea for the age of AI: each episode is a focused, in-person conversation with someone already navigating the shift, so the person listening walks away clearer and more in control — not more anxious. Not a hype channel, not a doom channel: what is real, what is overhyped, and what to actually do on Monday morning.

01

GROUNDING IN THE REGION

Sovereignty, data residency, regulation and government mandates are the main event here, not footnotes.

02

HONEST, NOT HYPED

Every guest is asked what is working, what they have learned to ignore, and what it actually cost.

03

A GENERATIONAL BRIDGE

The leaders deploying AI and the young people entering these fields, in the same conversation.

WHO THE SHOW IS FOR

The leader **deploying** AI under real constraints

The manager whose **team is being reshaped**

The graduate entering a **field being redrawn**

The builder shaping **what comes next**

Anyone who feels **behind** and wants to feel ready

HOSTED BY CAPTAIN SAID SAIDI

What to expect as a guest.

02

A relaxed, well-prepared studio conversation. You see your themes before we record and nothing is designed to catch you out. The goal is a sharp, useful episode that reflects well on you — **your honest perspective, warmly captured.**

SETTING

In-Studio

Our studio in Dubai Expo City; cameras, lighting and audio handled end to end. Address arrives with your confirmation.

LENGTH

30–45 min

Plan 75 minutes door to door. We edit for signal, so the episode is focused and easy to share.

LANGUAGE

Arabic · English

Arab guests record in Arabic, others in English — you choose. Every episode is subtitled and dubbed in both.

DISTRIBUTION

Video & Audio

YouTube (dubbed track in the other language) and podcast platforms, clips on Instagram (1M), LinkedIn, TikTok and Facebook, plus your episode page on the site.

HOW A SESSION RUNS

A

BEFORE — LIGHT PREP

A week ahead you receive the themes and question types; we ask for your preferred title, your language and the one link you want people to visit. Flag anything you would rather avoid.

B

IN STUDIO — THE CONVERSATION

Relaxed pace, real questions, room to think. Pause and restart any answer. Bring nothing; wear what you would wear to a good meeting — plain colours film best.

C

AFTER — YOUR EPISODE

We edit for clarity and share the release date. Ask us to leave out any sensitive segment before publishing. You receive clips and your episode page, free to repost.

WHAT WE'LL EXPLORE TOGETHER — a map, not a script; no technical traps

· Adapting to a new era

· Living with agentic AI

· The next generation

· The future of work

· The human side of change

· Hope vs fear

THE MOMENT IT BECAME REAL

- + When did you first feel that AI was going to change everything — not someday, but now? What was your honest first reaction?
- + From where you sit in the region, what is the difference between the AI everyone talks about online and the AI actually touching people's daily lives?

ADAPTING TO THE NEW ERA

- + How has the way you work changed in the last year? What does a normal day look like now that it did not before?
- + What is overhyped about AI right now that you have learned to tune out — and what is quietly real that more people should notice?

THE NEXT GENERATION — OUR SIGNATURE THEME

- + If a young person in this region asked you what to study, or what to become, to thrive in a world of AI, what would you honestly tell them?
- + What is one skill or quality that will matter more than ever, precisely because machines cannot do it?

THE FUTURE OF WORK & THE CLOSING MAJLIS

- + What do you say to someone who is afraid that AI will make their job, or their whole career, disappear?
- + For someone listening who feels anxious and behind, what is one small thing they can do this week to feel more in control and more hopeful?

Built around your comfort.

03

Storyteller and technology voice with 19 years alongside the Gulf's CTOs, CISOs and government digital chiefs. Licensed UAE creator reaching 1.6M+ followers; storytelling campaigns for the UAE Ministry of Economy and Tourism, the National Drug Enforcement Authority and MOCCAE.

This is a conversation, not an interrogation. A few commitments we make to every guest so you can walk in relaxed and walk out proud of the result.

- + **YOU SEE THE THEMES FIRST** — topics and sample questions ahead of time; suggest angles, flag anything you would rather leave out.
- + **NO GOTCHA QUESTIONS** — nothing is designed to embarrass you or pull a headline out of context.
- + **RESTART ANY ANSWER** — say so and go again; we edit for clarity, so the final cut shows your best take.
- + **RESPECT FOR CONFIDENTIALITY** — you decide where the line is, we stay well inside it, and you can cut a segment before release.
- + **CLIPS THAT WORK FOR YOU** — shareable clips of your episode, ready to repost to your own audience.
- + **A PAGE THAT KEEPS WORKING** — a permanent episode page on captainsaidsaidi.com with your bio, title and the link you choose.

Tell us how to make this great for you. **If there is a story you want to tell or a topic you want to own, we will build the conversation around it.**
